

Over the last five years, there has been a rise in theft incidents reported to the CargoNet® command center during the Labor Day holiday. Here is a snapshot of the events, including theft by state, commodity type, location type, theft type, and loss value from the Thursday before Labor Day to the Wednesday after.

137

Cargo Theft Incidents Reported

Top 3 Targeted States

Top Targeted Commodities

1. Electronics

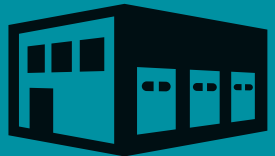

2. Household Goods

3. Food and Beverage

Top Targeted Location Types

1. Warehouse/DC

2. Parking Lot

Average Loss Value \$147,027

Total Loss Value

\$7,057,293

Labor Day Security Tips and Best Practices

Supply Chain Fraud Security Tips

- ★ Cargo thieves enjoy the holidays because shipping volume of desirable goods increases, as does demand. Freight brokers should be extra-diligent during the holiday season as fictitious pickups increase.
- ★ End-of-day transactions should have strict vetting processes; a second look by a supervisor prior to tendering a load to a carrier may prevent a theft.
- ★ A trucker that is willing to take an undesirable load for a lower rate than the industry standard may be setting you up for a theft.
- ★ Fuel advance, hostage load, and line haul scams also increase a few days before a holiday. Prior to issuing the fuel advance, call the shipper to confirm that the load was picked up. Do not accept incoming calls from a shipper trying to tell you the driver is there—it could be the scammers spoofing the phone number of the shipper.

In-Transit Cargo Security Tips

- ★ Make sure that both security managers and drivers have accurate license plate, VIN, and descriptive information for tractors, trailers, containers, and container chassis. Police agencies will need this information to open an investigation in the event of an incident. Drivers should keep this information on them so they can quickly reference it if their truck is stolen.
- ★ Secure all trailers (loaded and unloaded) with high-security ISO 17712-compliant barrier seals in combination with hardened padlocks. Use king pin locks for unattached trailers.
- ★ Secure all tractors with high-security locking devices, such as air-cuff and steering column locks.
- ★ Remind drivers to arrive at point of pickup well-rested, showered, and fed and with a full tank of fuel.
- ★ Avoid having loaded trailers sit unattended when employees are not present.

Warehouse / Distribution Center Security Tips

- ★ Check to make sure the entire facility is in good working order. This should include lighting, backup generators, alarm system(s), surveillance equipment, perimeter fencing, and any other type of barrier.
- ★ Remove keys from all facility equipment and place them in a secure location, especially motorized pallet jacks and forklifts.
- ★ Never treat any alarm signal as a false alarm. When targeting warehouse locations, cargo thieves tend to trip facility alarm systems multiple times before a break-in to give law enforcement and facility managers the impression that the alarm system is broken.
- ★ Encourage documentation and reporting of all suspicious activity that occurs in and around a facility to security personnel and the CargoNet command center. This information can be critical to law enforcement in the event of a cargo theft incident.
- ★ Ask local police agencies to make routine checks of facilities during holiday downtime.
